

I created 3 style tiles and prototypes, which also serve as wireframes.

1st prototype

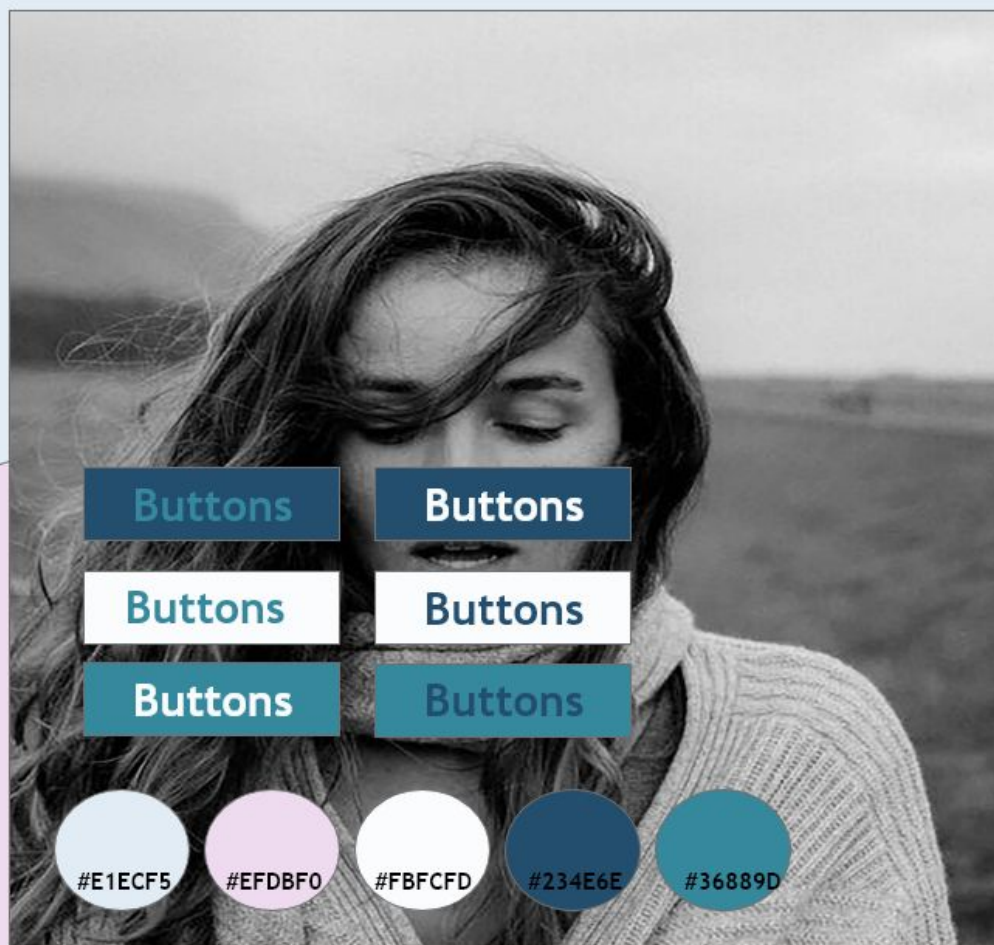

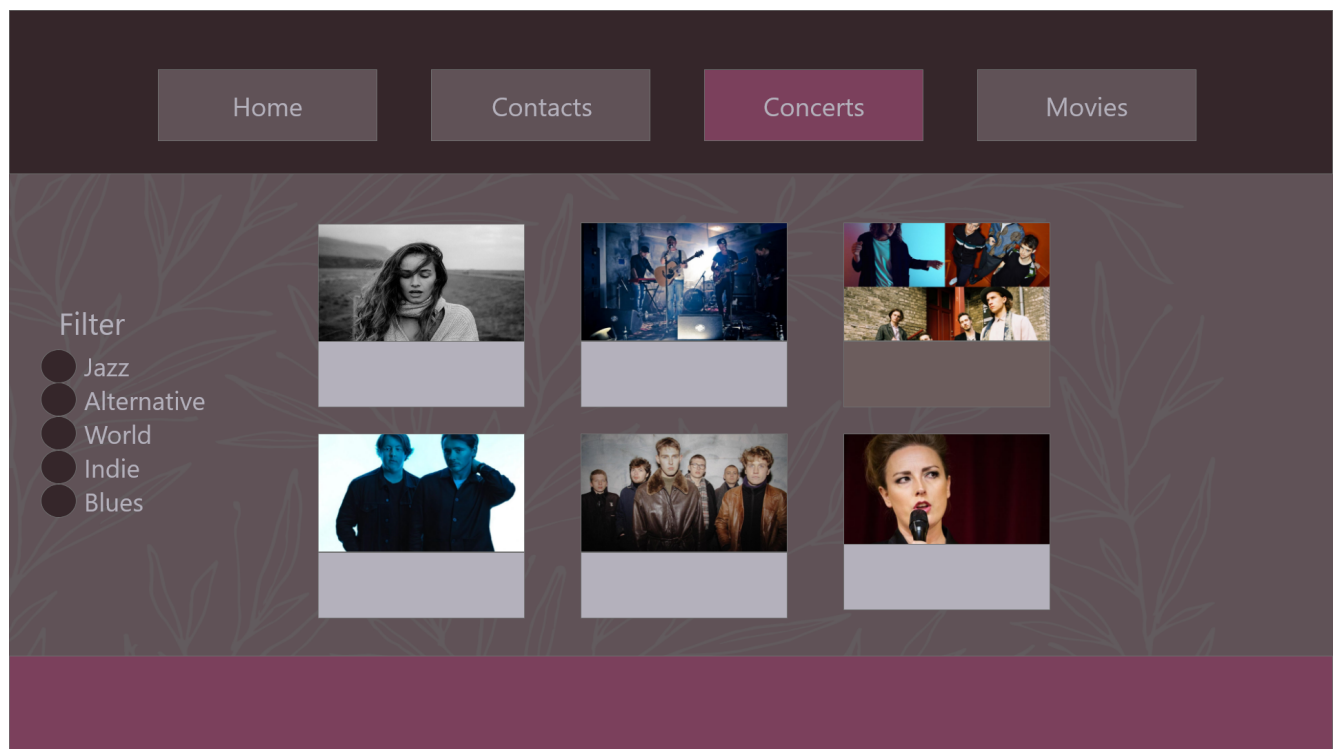

<h1>Music Events</h1>

<p>In 2016 the 23-year old singer embarked on her biggest adventure yet: „Expedition Happiness“. Together with her partner and film-maker Felix Starck she converted a 40 foot school bus into a loft on wheels and traveled through North America for one year. On glaciers in Alaska and in the jungle of Mexico, on mountain peaks and in the desert, MOGLI found inspiration for her second album „Wanderer“. Having her piano and guitar on board made it possible to write songs literally in the middle of nowhere.</p>

Style Guide

User Testing

The navigation and content structure of the application is pretty simple. The main purpose of the user testing was to decide if the home page containing simple navigation to three sub-pages is necessary. Opinions were radically different. As the result, I decided to keep the home page, but add some more content, for example, short description of the Huset-KBH.
